**INTERVIEW / PHOTO OPPORTUNITY:**

**GET YOUR EYES IN TOP SHAPE FOR THE PROM**

***- Brow Diva Offers Remedies for Common Eyebrow Problems -***

**ROCHESTER, N.Y.** – With prom season just around the corner, high school students are doing all that they can to look their best on prom night. Local eyebrow sculpting artist, Deanna Netti-Cahill of Brow Diva (in Pittsford), has seen an increase in the number of young women and men looking to get their eyebrows professionally shaped for the first time. Cahill provides tips to the students and parents preparing for the prom on how to avoid “prom night eyebrow disasters.”

**“Great brows are just as important as the dress or tuxedo – and the pictures last forever,”** said Cahill. **“The simple step of grooming brows has a huge impact on your appearance - even if you do nothing else.”**

Considering the amount of real estate that they take up on your face, your eyebrows have a huge impact on how you look. When they are well-groomed, they can make you look polished and pulled together. Cahill offers tips to prevent brow disasters prior to the big night out at the prom.

- Ask your parents for permission and let them take you to a brow shaping professional so you don't ruin the natural shape of your brows.
- Be conservative when plucking the stray hairs. Be careful not touch the shape of the brow. The tendency may be to over-pluck.
- Get your brows professionally waxed, trimmed and shaped once a month to maintain the "perfect" brow.
- The anticipation of pain is a common fear; however, the actual pain is never as bad as the anticipation (it's comparable to removing a bandage from your skin). The brow pro applies pressure immediately after removing the wax to help reduce any pain. The process goes by so quickly that you barely have time to feel it. Most everyone finds the experience relaxing.

**“Typically young men and women begin having their eyebrows professionally shaped as early as 12 years old,”** added Cahill. **“Having your brows professionally groomed or sculpted for the first time is now being viewed as a rite of passage by many. There has been an overall acceptance by parents who view this as a time to bond with their child.**

**-more-**
